This program can provide information on assisted living facilities in Virginia. Virginia Health Information (VHI) provides an overview of an assisted living facility. Visit

[Assisted Living Guide](#)

An Assisted living facility provides varying levels of service options. A residential living place provides minimal assistance with ADLs for adults who have only minor physical or mental limitations. An assisted living facility provides moderate assistance to those who may need more help than those residents enjoying an independent lifestyle at residential living levels. Meals are provided in congregate dining areas, and social and recreational activities are provided.
