F-Prime grew from one of America's great entrepreneurial success stories. Fidelity Investments was founded in 1946 and grew from a single mutual fund into one of the largest asset management firms in the world, with over \$2 trillion under management. For the last fifty years, our independent venture capital group has had the privilege of backing other great entrepreneurs as they built ground-breaking companies. We create and invest in healthcare and technology companies that improve lives all over the world. We work to facilitate scientific discovery, innovation, and collaboration that advance our understanding of Alzheimer's disease and related conditions.
